PROFESSIONAL EXPERIENCE

Web Developer [Raino Digi Media](#)

Mumbai • March 2025 – Present

- Building and maintaining production React.js applications with optimized component architecture and state management using Redux Toolkit
- Developed a reusable component library adopted across multiple projects, reducing UI development time significantly
- Integrated Node.js/Express.js APIs with real-time data processing and handled RESTful API deployments
- Proactively debugged and resolved critical production issues, maintaining high system uptime

Software Developer Intern [Cloud Connection](#)

Remote • Jan 2024 – Jun 2024

- Built responsive, cross-browser-compatible interfaces using React.js with modern design patterns
- Integrated RESTful APIs and implemented performance optimization techniques including code splitting and lazy loading
- Participated in agile sprint planning, code reviews, and technical documentation in a cross-functional team

PROJECTS

E-Commerce Platform (Production — In Progress)

[Next.js 14](#), [TypeScript](#), [Redux Toolkit](#), [RTK Query](#), [Firebase Auth](#), [Stripe](#), [MongoDB](#) • github.com/tejaskamble99

- Building a full-featured e-commerce app with Next.js App Router and TypeScript — migrated architecture from a Vite-based tutorial to production-grade Next.js independently
- Implemented Firebase Authentication synced with Redux state, RTK Query API slices, debounced coupon validation with Axios request cancellation, and complete cart logic
- Integrating Stripe for payment processing; pending features include shipping form, order management, and admin product upload UI

TaskFlow — Collaborative Task Manager

[Next.js 14](#), [TypeScript](#), [Socket.IO](#), [Express.js](#), [MongoDB](#), [JWT](#), [Tailwind CSS](#) • github.com/tejaskamble99/Collaborative-Task-Manager

- Built a full-stack real-time task management platform where updates appear instantly across all connected clients using Socket.IO — no page refresh needed
- Implemented JWT-based secure authentication and structured the backend using Controller-Service-Repository pattern for clean separation of concerns
- Built responsive dashboard with task prioritization (High/Medium/Low) and status tracking using Next.js 14 and TypeScript

Stock Market Prediction App v2

Python, Django, TensorFlow, LSTM, JavaScript, Docker • github.com/tejaskamble99/stock-prediction-v2

- Developed an LSTM neural network model for stock price prediction with a Django REST backend and JavaScript frontend, containerized using Docker

FREELANCE WORK

Frontend Developer (Freelance) Vibrant Hive Agency

Mumbai • 2024 – 2025

- Built the client's production business website — vibranthiveagency.in — from scratch using React.js and Vite, handling component architecture, responsive styling, and iterative client revisions
- Delivered multiple post-launch feature iterations including navbar logo updates, WhatsApp button integration, and desktop animation bug fixes via structured Git commits
